WHY USE THE MEDIUM?

¿Por qué el medium?

When we add another medium or even water to the formula, it can alter the composition, causing the paint to behave unexpectedly.

The medium is simply the type of resin used in the formula, ensuring the paint retains its properties and works without issues.

Cuando introducimos otro medium o incluso agua en la fórmula puede hacer que esta varíe y la pintura no se comporte como esperamos.

El medium es simplemente el tipo de resina utilizado en la fórmula, por lo que conservará las propiedades de la pintura para trabajar sin ningún problema.

The MEDIUM is a low-viscosity gel designed to maintain the properties of the formula while offering maximum performance.

This QUICK GEN medium allows the paint to glide more easily, with improved surface tension to prevent rings and stains, resulting in a uniform finish.

El MÉDIUM es un gel de baja viscosidad para mantener las propiedades de la fórmula ofreciendo máximo rendimiento.

Este medium de las QUICK GEN permite deslizar mejor la pintura, en la que se ha mejorado la tensión superficial para evitar cercos y manchas, permitiendo un acabado uniforme.
